

BlackRock ICS Sterling Liq Premier Acc (SEDOL: B43FT80)

As of 31/12/2023

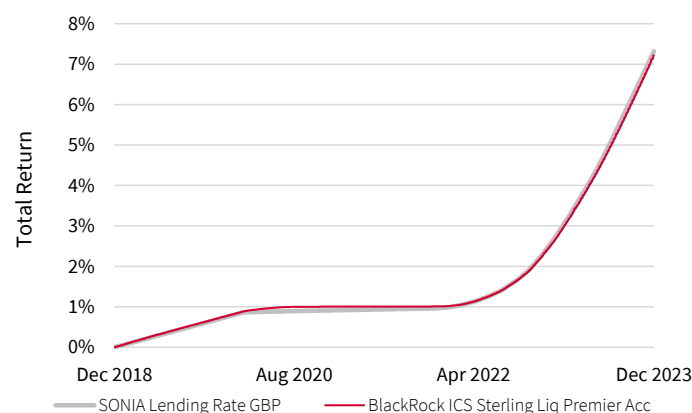

Fund Description

Fund Manager(s): Matt Clay since March 2009
Paul Hauff since March 2009

The BlackRock ICS Sterling Liquidity fund aims to maximise income and maintain capital in nominal terms whilst ensuring its underlying assets can easily be bought or sold in the market. Blackrock have long established pedigree investing in short term instruments having managed cash funds since 1973. The current managers, Matt Clay and Paul Hauff, are an experienced duo and have been running the portfolio since 2009, navigating through the very low interest rate cycle of the 2010's. The fund invests in short term money market instruments across the globe but is constrained to a maximum Weighted Average Maturity of 60 days (tends to operate at 30-50 days). Due to the nature of the investible universe, investors benefit from the significant size of Blackrock and this strategy as it grants more opportunities. However, returns can be muted given the fund invests in less risky area of the yield curve. With an OCF of 0.1%, the fund charges are competitive.
